## Bike World News

Cycling news, race results, new products, fitness, maintenance and more

### Interbike Coverage Starts Wednesday

SEPTEMBER 21ST, 2010 BY RON CALLAHAN

Partially in an effort to save money and partially to save my nasal passages from the hot dry air of Boulder Canyon, I'm taking a pass on Interbike's Outdoor Demo and heading straight to the show floor on Wednesday. I'm traveling light and fast this year, with little more than a notepad, iPhone and camera (and several changes of clothes), so I'll be posting occasional brief reports and photos to our [Twitter account](#) and then all of the reports will start on Saturday when I return to home base.

Of course, we've already been posting show news to our [Interbike page](#), so check that out over the next several days (and months) to see all of the latest. Photos uploaded to Twitter from the iPhone will post directly to [our gallery page](#), as well.

Here are just some of the companies that we have lined up for Wednesday: Native Eyewear, Skins, Yakima, Rideout Tech, Timbuk2, **FRS Healthy Energy**, BMC, Louis Garneau, Kuat, Volagi, Montague and Lemond Fitness.

Back on the home front, we'll be presenting a limited amount of news for the next several days. Tim the Editor will be bringing you race results, catching up on the start of the 'cross season and handling some product news for me as well.
